Social Statistics and Data Analysis: Museums

The problem of cultural education stands as one of the most prominent nowadays. Museums play an important role in remedying that problem by spreading ~~common~~<sup>public</sup> knowledge of history, art theory, philosophy and other sciences. ~~The~~ My task was to compile and analyse the data regarding museum visits in Britain.

Drawing on the table that was procured from the ~~the~~ "Social Statistics" service, the author had discovered several important features and trends connected to museum attendance. ~~First~~ First of all, the "visitors per year" rate had been steadily growing in free museums (the British Museum, the National Gallery, the Tate Gallery), of which the British Museum had shown the largest increase. ~~This fact~~ The second point is ~~the second~~ that museums which introduced admission charges ~~had~~<sup>have</sup> seen a substantial decrease in visiting rate. ~~the~~<sup>have</sup> the Natural History Museum and the Science Museum ~~lost~~<sup>have</sup> a chunk of their visiting statistics in the 2013-2015 period, dropping by 2.1 mln and 25 mln visits respectively. Nonetheless, those museums and institutions are still popular with the public: their appeal is shown by the numbers. In 2013 (the Science Museum exceeded the British Museum's statistics by 1.2 mln, and the Natural History Museum - by 1.1 mln) and by a growth trend in 2015-2017.

According to the data, statements made in the previous paragraph I ~~thus~~ suggest that, first and foremost, non-free-of-charge museums should eliminate or reduce their entry fees in order attract more visitors.
